

## Corporate Financial

Nikkei has compiled some of the most extensive files on Japanese corporate finances and the NEEDS databank has over 40 years of Corporate balance and income statements, cash flow and financial ratios for all listed and JASDAQ companies. All of the data in the NEEDS databank is provided in a consistent format to allow for accurate comparison between companies and industrial sectors.

All listed companies are required under Japanese law to submit quarterly financial statements (Yuho) to the Japanese FSA. In addition to the Yuho reports, companies also release financial statement flash reports (Tanshin) to the markets. Tanshin reports are released 30 days after the end of each fiscal quarter while the confirmed Yuho reports are submitted 45 days after the end of each fiscal quarter.

The information that is released is correlated and added to Nikkei's own research, gathered during individual company visits and questionnaires, to provide highly accurate, comprehensive and consistent company financial statements.

### Corporate Financial Data

Quarterly Yuho and Tanshin financial statements are stored on the same file. Nikkei Research data is also included to provide as much data as possible on all listed companies. File includes data on dividends, earning per share, equity and bond issuance, breakdown on current assets, leasing, expenses, tax, loans & liabilities, sales figures, gains/loss, profit, turnover and revenue, transfers of capital, pensions data etc. For a full list of all items, please see the examples in the Downloads section of this website. Unconsolidated Annual Statements are available from April 1964 and consolidated statements are available from April 1984.
